

# A Világ Legnagyobb Tanórája

## 2019. szeptember 30. – október 4.

Biodiversity, the preservation of biodiversity, is Hungary's major topic for the World's Largest Lesson in 2019.

Class of 7. i of **Táncsics Mihály Elementary School of Cegléd** is also joining the program.

14 LIFE BELOW WATER

15 LIFE ON LAND

The participating students learnt about biodiversity and created presentations about it. Later, as the classes are over they clean the school's environment and take care of the freshly planted young trees. They are already selecting recyclable trash and encourage other students to do so, as well. They no longer use disposable plastic bottles, everyone has their own bottle that they fill up several times a day.
